Satisfaction Notice

It was a great pleasure working with Cuberto team. Previously we had only out-dated website created in mid 2000th, we were excited to create new one but had no idea how to do it, no thoughts regards the visuals and ways how to present our company and production.

Cuberto did an amazing job taking care of every single aspect of a new website production starting from idea and finishing with the launch of final website. We had a couple of meeting in our facilities, demonstrated them our production and provided with the details about the technology we use.

On behalf of Ferrumpipe team I'm expressing my gratitude and wish Cuberto success and prosperity!

Sincerely,

Yuri Podnebesov
Chief Technology Engineer
